Hyderabad, India

SUMMARY

I'm a **Software Engineer** with **3 years of experience** building scalable mobile applications for **Android and iOS** using **React Native**. Strong in end-to-end development including **API integration, Redux state management, responsive UI,** and performance optimization. Experienced in **payments (BBPS/gateways), KYC flows, push notifications, Google Maps**, analytics tracking **(Google/Facebook)**, and **social authentication (Google/Apple/Facebook)**.

WORK EXPERIENCE

Software Engineer(App Development) Sep 2025 - Present

Abilio It Solutions pvt ltd I Madhapur,Hyderabad

- Developed and delivered **end-to-end cross-platform mobile applications** (Android & iOS) using **React Native**, from requirement analysis to production release.
- Implemented scalable application architecture with **reusable components**, clean folder structure, and optimized state management for long-term maintainability.
- Designed and integrated **Dark Theme / Light Theme** support across the application for improved accessibility and user experience.
- Integrated **Google Maps SDK** for location-based services including current location, map view, and address selection.
- Implemented **Push Notifications** using Firebase for real-time updates, promotional alerts, and booking/job status notifications.
- Integrated authentication modules including **Google Sign-In**, **Facebook Login**, and **Apple Sign-In** for secure and seamless user onboarding..
- Worked with multiple REST APIs for service listing, booking flow, payments, user profile, and job apply modules..
- Published applications to **Google Play Store and Apple App Store**, handling build generation, certificates, provisioning profiles, versioning, and release management.
- Implemented and monitored mobile analytics using **Google Analytics / Firebase Analytics** to track user behavior, retention, and conversion.
- Debugged critical issues and improved performance by reducing re-renders, optimizing API calls, and enhancing UI responsiveness.
- Collaborated with UI/UX designers, backend developers to deliver stable, scalable, and production-ready apps.

Software Engineer(App Development) Sep 2023 - Sep 2025

Neo-teq Software Private Ltd | New Nallakunta, Hyderabad

- Developed and maintained mobile applications for **Android (Java, Android SDK)** and **cross-platform (React Native)** platforms.
- Designed and implemented user interfaces using XML layouts for Android and React Native components (JSX, styled-components).
- Integrated **RESTful APIs** to enable seamless data exchange between mobile applications and backend services.
- Implemented local data storage and **AsyncStorage** (React Native).
- Optimized application performance to ensure high responsiveness, faster load times, and smooth user experience.
- Performed unit testing, debugging, and performance tuning to maintain stability and high-quality builds.
- Collaborated with **UI/UX designers** to convert wireframes and mockups into functional and visually appealing mobile screens.
- Participated in **code reviews** and worked with cross-functional teams to deliver scalable and user-friendly solutions.

PROJECTS

Sevaki – User App (Home Services Booking Platform)

Client: Sevaki technology Pvt Ltd

Role: React Native Developer

Tech: React Native, JavaScript/TypeScript, Redux/Zustand, REST APIs, Firebase (FCM), Google Maps, SMS Retriever API, Razorpay Payment Gateway

- Developed an end-to-end **home services booking app** for services like **home/kitchen/bathroom cleaning, pest control, men salon, and women spa**.
- Implemented full booking flow: **service selection → cart → location/address → date & slot → checkout → confirmation → tracking**.
- Built key UI screens including **categories, service details, cart, slot selection, checkout, booking history, and profile** for Android & iOS.
- Integrated REST APIs for **services, slot availability, booking creation, order status updates, and history**.
- Implemented **Google Maps**, **auto OTP read (SMS Retriever API)**, and **Firebase push notifications** for booking updates and reminders.
- Integrated **Google Analytics and Facebook Analytics** to track **user behavior, screen events, conversions, and retention**, supporting product insights and performance monitoring.
- Optimized app performance, managed **Redux/Zustand** state, and supported production releases on **Google Play Store** and **iOS builds using Xcode**.
- Integrated **Razorpay payment gateway** for secure online payments and transaction handling.

Rono Jobs (Job Search & Apply Platform)

Client: Rayudu Groups
Role: React Native Developer
Tech: React Native, JavaScript/TypeScript, Redux/Zustand, REST APIs, Firebase (FCM)

- Developed a **job portal mobile application** where users can **search jobs, filter by category/ location/experience**, view job details, and apply directly.
- Implemented job seeker features including **resume/profile creation & update**, job save/apply flow, and **application tracking**.
- Added **interview scheduling module**, enabling users to view interview updates and schedule details from the app.
- Implemented **resume template download** feature to help users generate/download resumes easily.
- Supported **Freelancer job module**, allowing freelancers to search, view, and apply for gigs/projects.
- Integrated backend REST APIs for job listing, job apply, profile management, interview scheduling, and resume templates.
- Implemented **Push Notifications (FCM)** for job alerts, application updates, and interview notifications.
- Implemented **Dark Theme / Light Theme** across the application for better user experience and accessibility.
- Designed reusable UI components and optimized screens for improved **loading speed and smooth performance**.

SkillTech LMS (Learning Management System for ITI Students)

Client: SkillTech Enterprise Solutions Private Limited
Role: React Native Developer
Tech: React Native, JavaScript/TypeScript, Redux, REST APIs, Firebase (FCM)

- Developed a **Learning Management System** (LMS) mobile application for **ITI students** to access courses, study materials, and learning resources.
- Implemented secure **Student** and **Teacher login** with role-based authentication.
- Developed an **Online Examination** module with timer, auto-submit, and secure exam flow.
- Implemented Student Attendance Tracking, allowing students to view attendance and teachers to manage attendance records.
- Integrated REST APIs for authentication, course content, exams, attendance, results, and profile management.
- Implemented **Firebase Cloud Messaging (FCM)** for exam schedules, announcements, and important notifications.
- Designed reusable UI components and optimized application performance for a smooth and responsive user experience.
- Collaborated with backend developers and QA teams to deliver a secure and reliable mobile application.

PAYZIGO Consumer
Company: Neo-teq Software Pvt Ltd
Role: React Native Developer
Tech: React Native, JavaScript/TypeScript, REST APIs, Coupons APIs, BBPS & Recharge APIs, PayU, Cashfree

- Developed and maintained **PAYZIGO Consumer mobile application** for bill payments and recharge services across Android & iOS platforms.
- Implemented **BBPS integration** to support utilities bill payments and services like **Mobile Recharge, DTH Recharge, Electricity, Water, Gas**, etc
- Built UI screens and flows for **bill payment/recharge**, transaction history, and payment confirmation modules.
- Implemented **Rewards / Earn Coins module**, allowing users to earn coins for transactions and redeem benefits inside the app.
- Developed **Coupons flow** including apply/remove coupon, validations, and integrated coupon APIs for tracking and redemption.
- Integrated **KYC verification (Aadhaar & PAN)** and supported secure onboarding/authentication modules.
- Supported payment gateway integrations (**PayU / Cashfree**) ensuring secure and smooth end-to-end payment transactions.

Bill BARO
Company: Neo-teq Software Pvt Ltd
Role: Android Developer
Tech: Java, Android SDK, REST APIs, BBPS

- Developed and maintained Android application modules for **BBPS (Bharat Bill Payment System)** bill payment integration.
- Implemented secure **payment and transaction APIs**, ensuring compliance with BBPS standards and successful transaction flow.
- Integrated **telecom operator recharge** services with validation and error handling for reliable user transactions.
- Improved app stability and performance through debugging, optimization, and handling edge-case scenarios.

EDUCATION

Bachelor of Technology (B. Tech.) July 2019 - May 2022
Sri Indu College of Engineering and Technology , Ibrahimpatnam(Hyderabad)

SKILLS

Mobile Development: React Native, Android (Java), Android SDK

Programming Languages: Java, JavaScript, TypeScript

UI Development: XML, JSX, Styled Components, Responsive UI

State Management: Redux, Context API,Zustand

API Integration: REST APIs, Axios, Fetch

Database / Storage: AsyncStorage

Maps & Location: Google Maps, Geolocation

Payment Gateway Integration: PayU, Cashfree, Razorpay

Authentication: Google Sign-In, Facebook Login, Apple Sign-In

Notifications: Firebase Push Notifications (FCM)

Tools / Platforms: Git, GitHub, Postman, Android Studio, Xcode, VS Code

Deployment: Google Play Store, Apple App Store

Analytics: Firebase Analytics, Google Analytics

ACHIEVEMENTS

- **Awarded "Best Software Performance"** for implementing and optimizing **Payout API integration** in the Payzigo mobile application, enabling secure and efficient money transfers and payouts; received **₹30,000 reward** for successful delivery and performance improvement.
- **Gold Medalist** in Diploma for academic excellence.
